### **ELECTION BY ORIGINAL PRESENTATION**

Newly submitted claims 24-26 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The newly submitted claims and those originally submitted are related as process of use and product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used to practice another and materially different process, such as one which involves gases rather than liquids.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 24-26 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Behman on 6/18/2007.

The application has been amended as follows:

Claims 24-26 have been canceled as being drawn to a nonelected invention.

Claim 23 has been amended as follows: In line 2, the phrase - - comprising the steps of flowing a first liquid through the center tube and flowing a second liquid through the plurality of channels - - has been inserted between "flow," and "wherein".

#### **DRAWING CHANGES**

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: An additional figure (new Figure 6) is to be added showing "each of the plurality of channels only completes a single wrapping of the center tube". In addition, the specification must be amended under rule 312 to provide an appropriate description or reference to the new drawing in the appropriate places therein. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes and amendments to the specification.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (571) 272-4910. The examiner can normally be reached on M-F 9:00-5:30.
